DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 10 June 2005 have been fully considered but they are not persuasive. Because as applicant's remark that "the limitation controlling the switching operation in the standby mode according to a feedback voltage from the feedback circuit", the examiner respectfully disagreed because Huh et al. clearly disclosed the added claimed subject matters (see abstract, line 5-15). Further with respect to claims 24-27, it is noted that the assembly of Huh et al meet the structural limitations, see fig 1 and column 1, line 55-69 of Huh et al, with respect to claims 28-31, Huh et al clearly disclosed the claimed subject matter see, column 4 lines 40-50.

Conclusion

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Application/Control Number: 10/672,997 Page 3

Art Unit: 2838

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 6-13 and 18-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Huh et al. (U.S. Patent # 6,252,783).

Huh et al. disclose the claimed invention a switching mode power supply (figure 1-4), including a power supply unit (figure 1, item 100), a main switch (figure 1, item SW1), a primary coil (figure 1, item L1), a normal operation mode (Abstract, line 1-3), a mode setting unit (Abstract, line 4-7), a feedback circuit (figure 1, item 200), a switching controller (figure 1, item 300), switching on/off in standby mode (column 2, line 10-16), a feedback circuit and current varies with mode setting (column 3, 35-55), the normal operation mode being different from the quantity of current flowing through the switching controller in the standby mode.(column 7, line 1-45). The newly added claims also

Art Unit: 2838

Allowable Subject Matter

3. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hong et al. (U.S. patent #6,646,894) in combination with Huh et al. (U.S. patent #6,252,783).

Hong et al. disclose the claimed invention a switching mode power supply (figure 1), including a power supply unit (figure 1, item 100), a main switch (figure 1, item Qsw), a mode setting unit (figure 1, item 400), a standby mode (column 2, line 15-30). Hong et al. does not disclose the utilization of the technique for feedback circuit. Huh et al. teaches the utilization of the similar technique for feedback circuit (Abstract, line 5-15). It would have been obvious one having an ordinary skill in the art at the time the invention

Application/Control Number: 10/672,997

Art Unit: 2838

was made to modify Hong et al.'s power supply by utilizing the technique taught by Huh et al. for the purpose of increasing efficiency of the power supply.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rajnikant B. Patel whose telephone number is 571-272-2082. The examiner can normally be reached on 6.30-5.00; m-f.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Sherry can be reached on 571-272-2084. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
